

Subject	TYPES OF DATA														
Context	Throughout the course, you will need to see that data is classified to make it easier to process. You will explore the different kinds of data, and how it can be collected in the form of measurements or observations of variables. You will also see how different kinds of data are represented using a variety of diagrams.														
Securing	<p>Match these types of data to their meanings</p> <table><tr><td>Primary Data</td><td rowspan="6"></td><td>Data other people have collected</td></tr><tr><td>Quantitative Data</td><td>Data that is described in words (eg colours)</td></tr><tr><td>Discrete Data</td><td>Data you collect yourself</td></tr><tr><td>Qualitative Data</td><td>Data which takes any numerical value ie. decimals</td></tr><tr><td>Secondary Data</td><td>Data that is in numbers</td></tr><tr><td>Continuous Data</td><td>Data that takes certain numerical values (eg. Shoe sizes)</td></tr></table>		Primary Data		Data other people have collected	Quantitative Data	Data that is described in words (eg colours)	Discrete Data	Data you collect yourself	Qualitative Data	Data which takes any numerical value ie. decimals	Secondary Data	Data that is in numbers	Continuous Data	Data that takes certain numerical values (eg. Shoe sizes)
Primary Data		Data other people have collected													
Quantitative Data		Data that is described in words (eg colours)													
Discrete Data		Data you collect yourself													
Qualitative Data		Data which takes any numerical value ie. decimals													
Secondary Data		Data that is in numbers													
Continuous Data		Data that takes certain numerical values (eg. Shoe sizes)													
Processing	<p>The PE staff of a school were recording the times and distances in running and throwing events at the school sports day. Which of the following best describes the type of data collected:</p> <p><b>Primary</b>   <b>Secondary</b>   <b>Qualitative</b>   <b>Continuous</b></p>														
Exploring	<p>Which best describes the data in the pie chart?</p> <p><b>Pets</b></p> <div><ul style="list-style-type: none"><li>cat</li><li>dog</li><li>rabbit</li><li>snake</li></ul></div> <p><b>QUALITATIVE</b></p>														
Reviewing	<p><b>Marked Question:</b></p> <p>Darren is researching the average shoe size in different parts of the world. He finds a few websites with the data he requires.</p> <p>What describes the data he will be collecting? (2 marks)</p> <p><b>SECONDARY &amp; DISCRETE</b></p>														

Subject	PERCENTAGES
Context	In Core Maths, we often work with percentages. Being able to fluently manipulate percentages is essential to solving a variety of financial problems that will be encountered in the course. Simple interest, compound interest, mortgages, taxation, AER and APR are just a few topics that will require confidence with the use of percentages!
Securing	<p>Question 1: Write down the multipliers that are equivalent to the following percentages</p> <p>(a) 50% <b>0.5</b> (b) 80% <b>0.8</b> (c) 10% <b>0.1</b> (d) 25% <b>0.25</b>  (e) 45% <b>0.45</b> (f) 95% <b>0.95</b> (g) 5% <b>0.05</b> (h) 3% <b>0.03</b>  (i) 7% <b>0.07</b> (j) 36% <b>0.36</b> (k) 71% <b>0.71</b> (l) 44% <b>0.44</b>  (m) 0% <b>0</b> (n) 175% <b>1.75</b> (o) 104% <b>1.04</b> (p) 160% <b>1.6</b>  (q) 7.5% <b>0.075</b> (r) 1.2% <b>0.012</b> (s) 0.8% <b>0.008</b> (t) 0.01% <b>0.0001</b></p> <p>Question 2: Work out</p> <p>(a) 20% of 90cm <b>18cm</b> (b) 70% of 3km <b>2.1km</b> (c) 15% of \$4500 <b>\$675</b>  (d) 57% of £58650 <b>£33430.50</b> (e) 3.9% of 40cm <b>1.56cm</b> (f) 106% of 8km <b>8.48km</b></p>
Processing	<p>Question 3: Write down the multipliers that are used to calculate a:</p> <p>(a) 4% increase <b>1.04</b> (b) 15% increase <b>1.15</b> (c) 30% increase <b>1.3</b> (d) 62% increase <b>1.62</b></p> <p>Question 4: Work out each of the following</p> <p>(a) 60ml increased by 70% <b>102ml</b> (b) £940 increased by 8% <b>£1015.20</b> (c) 143g increased by 19% <b>170.17g</b></p> <p>Question 5: Write down the multipliers that are used to calculate a:</p> <p>(a) 2% decrease <b>0.98</b> (b) 8% decrease <b>0.92</b> (c) 12% decrease <b>0.88</b> (d) 15% decrease <b>0.85</b></p> <p>Question 6: Work out each of the following</p> <p>(a) 80ml decreased by 4% <b>76.8ml</b> (b) £480 decreased by 13% <b>£417.60</b> (c) 143g decreased by 40% <b>85.8g</b></p>
Exploring	<p>Sam invests £1800 in the bank for four years.  It earns compound interest of 4% each year.  Calculate the total amount Sam has in the bank at the end of four years.</p>  <p><b><math>£1800 \times 1.04^4 = £2105.75</math></b></p>
Reviewing	<p><b>Marked Question:</b></p> <div data-bbox="389 1675 1059 1854" style="border: 1px solid black; padding: 5px;"> <p>An adult ticket for the cinema costs £13.40  A child ticket is half the price of an adult ticket.  Mr and Mrs Henderson and their six children go to see a movie.  Mrs Henderson has a voucher for 18% off.  Work out how much Mrs Henderson pays for the tickets.</p> </div> <p>(4 marks)</p> <p><b><math>£13.40 \div 2 = £6.70</math> ✓</b>  <b><math>2(13.40) + 6(6.70) = £67</math> ✓</b>  <b><math>0.82 \times £67</math> ✓</b>  <b><math>=</math></b>  <b><math>£54.94</math> ✓</b></p>

<b>Subject</b>	<b>ROUNDING AND ESTIMATING</b>	
<b>Context</b>	During Core Maths, you will recognise that mathematics in the real world does not come as neat little questions, but as larger challenges that are solved by making appropriate assumptions. The ability to round and estimate effectively is therefore essential in dealing with these types of problems.	
<b>Securing</b>	<p>(a) Write 5725 to the nearest 100.</p> <p style="text-align: center;"><u>5700</u></p> <p>(b) Write 83.07718 correct to two decimal places.</p> <p style="text-align: center;"><u>83.08</u></p> <p>(c) Write 6.35 correct to 1 decimal place.</p> <p style="text-align: center;"><u>6.4</u></p> <p>(d) Write 129.34952 correct to 1 decimal place.</p> <p style="text-align: center;"><u>129.3</u></p> <p>(e) Write 65.047 correct to 2 decimal places.</p> <p style="text-align: center;"><u>65.05</u></p>	
<b>Processing</b>	<p>(a) Round 41982 to one significant figure</p> <p style="text-align: center;"><u>40000</u></p> <p>(b) Round 8812 to one significant figure</p> <p style="text-align: center;"><u>9000</u></p> <p>(c) Round 0.0761 to one significant figure</p> <p style="text-align: center;"><u>0.08</u></p> <p>(d) Round 9.99 to one significant figure</p> <p style="text-align: center;"><u>10</u></p>	
<b>Exploring</b>	<p>Question 4: Work out estimates to the following</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>(a) <math>\frac{291 + 602}{102}</math></p> <p><u><math>300 + 600</math></u></p> <p><u>100</u></p> <p><u><math>\approx 9</math></u></p> </div> <div style="text-align: center;"> <p>(b) <math>\frac{8019}{711 - 508}</math></p> <p><u><math>8000</math></u></p> <p><u><math>700 - 500</math></u></p> <p><u><math>\approx 40</math></u></p> </div> <div style="text-align: center;"> <p>(c) <math>\frac{7.14 + 16.88}{10.96 - 4.85}</math></p> <p><u><math>7 + 20</math></u></p> <p><u><math>10 - 5</math></u></p> <p><u><math>\approx 5.4</math></u></p> </div> </div>	

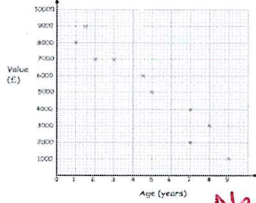

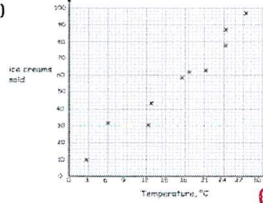

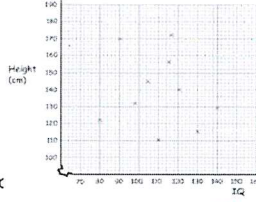

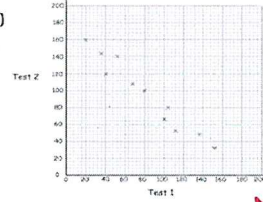

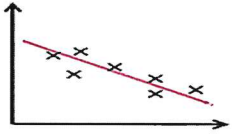

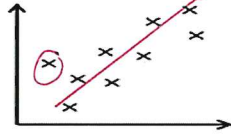

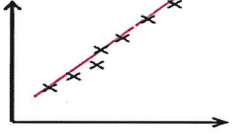

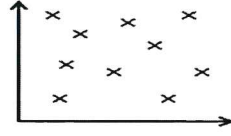

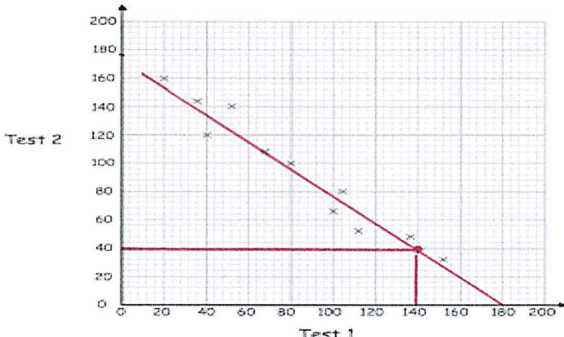

Reviewing	<p><b>Marked Question:</b></p> <p>In a cinema there are 28 rows and in each row there are 22 seats. Each ticket costs £8.10</p> <p>Work out an estimate for the total income from the ticket sales.</p> <p>(3 marks)</p>
-----------	--

$$\begin{array}{l}
 28 \approx 30 \\
 22 \approx 20 \\
 \text{£}8.10 \approx \text{£}8
 \end{array}
 \left. \vphantom{\begin{array}{l} 28 \approx 30 \\ 22 \approx 20 \\ \text{£}8.10 \approx \text{£}8 \end{array}} \right\} \checkmark$$

$$(30 \times 20) \times 8 \quad \checkmark$$

$$\approx \text{£}4800 \quad \checkmark$$

<b>Subject</b>	<b>SCATTER GRAPHS</b>
<b>Context</b>	In GCSE you have learnt to plot and draw scatter graphs. In Core Maths, you will build on these skills. You will recognize when pairs of data are uncorrelated and correlated, and understand the idea of an outlier. You will fully appreciate the correlation does not necessarily imply causation. It is essential you are fluent with all GCSE skills related to Scatter Graphs.
<b>Securing</b>	<p>Question 2: What type of correlation does each scatter graph show below</p> <div style="display: flex; flex-wrap: wrap;"> <div style="width: 50%;"> <p>(a)</p>  <p style="text-align: center;">Negative</p> </div> <div style="width: 50%;"> <p>(b)</p>  <p style="text-align: center;">Positive</p> </div> <div style="width: 50%;"> <p>(c)</p>  <p style="text-align: center;">No</p> </div> <div style="width: 50%;"> <p>(d)</p>  <p style="text-align: center;">Negative.</p> </div> </div>
<b>Processing</b>	<p><b>Line of Best Fit Task</b></p> <p>Draw a line of best fit, where possible, for each of the following scatter graphs.</p> <div style="display: grid; grid-template-columns: 1fr 1fr; gap: 10px;">     </div>
<b>Exploring</b>	<p>Some rugby players take two tests, one measuring speed and the other measuring strength. Each test is marked out of 200.</p> <p>The scatter graph compares the results.</p>  <p>(a) What type of correlation does this scatter graph show?</p> <p style="text-align: right;">Negative</p> <p>(b) Draw a line of best fit on the scatter graph.</p> <p>Brian scores 40 in Test 2.</p> <p>(c) Estimate his score in Test 1.</p> <p style="text-align: right;">140</p>

Marked Question:

3. The table shows the time spent revising and the test scores of ten students.

Time spent revising (hours)	9	0.5	1	4	6	2	3	7	5	8
Test result (%)	90	20	38	62	68	32	46	70	60	86

The first seven points have been plotted on this scatter diagram.

- (a) Complete the scatter diagram. (1)
- (b) Describe the relationship shown in the scatter diagram.  
*As the time spent revising increases, so does the test score (Positive correlation)* (1)
- (c) Draw a line of best fit on your scatter diagram. (1)
- (d) Another student has spent 4.5 hours revising.  
 Use your line of best fit to estimate their test result.  
*57* % (1)
