

Writing Word Equations for Reactions

1, Magnesium burning in oxygen

2, Potassium reacting with water

3, Heating of calcium carbonate

4, Lithium hydroxide reacting with sulfuric acid

5, Zinc carbonate reacting with nitric acid

6, Aluminium reacting with sulfur

7, Ethanol (C_2H_5OH) burning completely in oxygen

8, Methane burning incompletely in air

9, Sodium oxide reacting with hydrochloric acid

10, Magnesium reacting with copper sulfate
